5th Clinical Course of Internal Medicine & Surgery

April 12-14, 2019 | Chamber of Achaia &
Faculty of Medicine of the University of Patras

The CCIMS

The Clinical Course of Internal Medicine – CCIM is the biggest event of the Chapter of Patras of the Scientific Society of Hellenic Medical Students – SSHMS. The first Course was held the 27-28 of September, 2014, in the Conference Hall of Agora Argiri in Patras. Now, after four consecutive years in which the Course is held, it has been established as the most significant event of our Chapter.

From the beginning, the Course was fully supported by the Faculty of Medicine of the University of Patras, while it was and it remains, an open invitation to all greek medical students and graduates, so as to participate in a three-day course based on major topics of Internal Medicine.

The Scientific Program, which has been endorsed by the Professors of the Faculty of Medicine of the University of Patras and representatives of other academic and non-academic Institutions of Health, gives the opportunity to the participants to attend original presentations, clinical cases with the active participation of the audience and clinical courses, while it permits to the participants acquire hands-on experience via Workshops of medical daily life simulation.

After four successful events, the Clinical Course of Internal Medicine – CCIM is renewed and improved with the aim to offer to the participants a fully experience of Medicine. This year, for the 5th anniversary of the first course, the Internal Medicine meets the Surgery in the 5th Clinical Course of Internal Medicine & Surgery – CCIMS, in a new edition, more interesting and more interactive for all the participants.

The Clinical Course has been established and offers knowledge, experiences and motivation for the future to all the participants.

Find it out !

Welcome Letter of the Organizing Committee

Dear friends,

It is a great pleasure and enthusiasm to welcome you in the 5th Clinical Course of Internal Medicine & Surgery – CCIMS which will take place the 12th – 14th of April, 2019 in the Chamber of Achaia and the Faculty of Medicine of the University of Patras.

This year, the anniversary nature of the Course, which has been established as the most significant event of the Chapter of Patras of the SSHMS, and which counts the fifth year, has led us to insert innovations, the aim of which is the improvement and the renewal of the existing sessions, and furthermore the interrogation of new ones. The main aim of the Course is always to adapt to the students' knowledge, so as to be a valuable experience for all.

The most important innovation of the 5th CCIMS is the interrogation of the field of Surgery, giving the chance to the participants to interact with the whole spectrum of Medicine. At the same time, the import of new sessions, such as medical debates and clinical cases, enables the audience to participate actively in the Course. A particular chapter are the Round Tables of medical students, which give the opportunity to more students to familiarize with public speaking in the context of a certified student course. Last, but not least, in the Scientific Program will be included interactive Workshops, though which the participants will have the opportunity to simulate their future daily clinical practice.

In our anniversary meeting, we are trying to become better and we call you to join us, with interest and enthusiasm, in the renewed 5th Clinical Course of Internal Surgery & Surgery – CCIMS, and we hope to be worthy of your expectations.

On behalf of the Student Organizing Committee, which is the foundation of our Chapter, we welcome you in the beautiful Patras, in the Chamber of Achaia, in the 5th CCIMS!

Stergios Nasikas

President of the Organizing
Committee of the 5th CCIMS

Panagiotis Efthimiou

General Secretary of the 5th CCIMS

Faculty of Medicine of the University of Patras

The SSHMS

The Scientific Society of Hellenic Medical Students – SSHMS was founded in September 1993 and is a Non-profit and Non-Governmental Civil Society with broad volunteering activity. It consists of 7 Chapters in all Greek Medical Faculties and lists more than 3000 members. Its actions are targeted towards all medical students, as well as students of related health science Faculties.

The aim of SSHMS is the activation of medical students and their involvement in scientific, social and educational matters, while its goal is the production of scientific and social work, with a clear focus on the selfless giving and volunteering.

At the same time, the SSHMS's activities, independently of their scientific, educational and social character, also aim to strengthen the ties between medical students and students of related health science Faculties, through the reinforcement of team work and the cultivation of cooperation. The work of SSHMS has long exceeded the borders of the university institutions and now enters partnerships with public and private institutions, as well as social organizations, paving the ground for development of initiatives by the young.

The SSHMS has entered partnerships with the majority of scientific institutions of our country, such as the Panhellenic Medical Association and local corresponding associations, the Athens Medical Society, the Hellenic Cardiological Society and many more, but also with international ones, such as the American College of Surgeons and the Institute of Electrical and Electronic Engineers. At the same time, it keeps close relationships with a number of voluntary organizations, such as Doctors of the World and the Ark of the world.

For more information about us and the events in each of our Chapter, please visit our official Website www.eefie.org.

The Chapter of Patras

The Chapter of Patras of the S.S.H.M.S. was founded in 1993 at the same time with the foundation of the Scientific Society of Hellenic Medical Students and after a short absence it was open to the public again the May 17, 2010. Since then it maintains an indispensable part of the Medical Faculty of Patras with its enormous range of activities in cooperation with academic and other partners. Today the Chapter of Patras enumerates over 470 active members and we continue stronger !

Checkpoints in the modern history of the Chapter of Patras of SSHMS are the organizing of the 9th Scientific Congress for Hellenic Medical Students & 7th International Forum for Hellenic Medical Students and Junior Doctors in April 19-21, 2013, at the Conference and Cultural Center of the University of Patras, and the 22nd Scientific Congress for Hellenic Medical Students & 10th International Forum for Hellenic Medical Students and Junior Doctors and the Clinical Course of Internal Medicine for Medical Students and Medical Graduates, in May 13-15, 2016, at the Conference and Cultural Center of the University of Patras.

During each Academic Year, under the auspices of the Chapter of Patras, events are organized based on the needs of the students of the Faculty of Medicine and the hot topics of the society and volunteerism. More specifically, our events are distinguished in four main categories :

Educational Workshops

The medical students are trained in basic clinical skills, like trauma suturing and fracture immobilization and in more specialized techniques.

Educational Seminars

In cooperation with Academic and non Academic Partners the students are educated in First Aid and cases of urgency, and they get informed about the hot topics and the breakthroughs in the Medical field.

Informative Meetings

The aim of the meetings is to raise awareness among students and society on today's major issues such as vaccination and organ transplantation.

Actions of Volunteerism

During the academic year blood donations, street actions and food collection take place under the auspices of the Chapter of Patras.

Workshops

After a short break of the last years the 5th CCIMS is here with one main aim : the preferences and the needs of the medical students. It is not possible to organize the CCIMS without Workshops, so this year the choices and the surprises will be more than ever !

It is undeniable that the theory must be combined with practice, so numerous of practical and theoretical Workshops will be held under the Scientific Program of the Seminar this year.

The Workshops are many but the most important is that they have been designed by a renewal team so as to correspond to the preferences and the interests of the students. The theoretical Workshops provide a clear clinical approach focused on the daily serious clinical cases with which the future doctor will come across. On the other hand, the practical Workshops provide clinical skills necessary for all the future physicians.

Our main goal is the most interactive participation of the students in this Workshops, without hesitation for asking a question or a passive attendance of another speech. The ideas have been discussed, the preparation has been completed and the results are ready to be evaluated !

Student Round Tables

In the 5th Clinical Course of Internal Medicine & Surgery, the students of the Faculty of Medicine of the University of Patras, participate actively with their oral presentations in the context of Clinical Round Tables under the supervision of the Scientific Society.

The duration of each Round Table is 45 minutes and each Round Table consists of one Professor-Supervisor and four Students-Speakers of the Faculty of Medicine of the University of Patras, who will be called to present medical subjects.

The choice of the four students who will take part in the Round Tables will be based on the order of preference of the Round Tables in their Registrations Form and the Criteria which have been enacted by the Organizing Committee of the Seminar.

5th Clinical Course of Internal Medicine & Surgery

April 12-14, 2019 | Chamber of Achaia &
Faculty of Medicine of the University of Patras

General Information

Organizer

Chapter of Patras

Scientific Society of Hellenic Medical Students - SSHMS

Date & Venue
