WELCOME LETTERS

Dear Professors, Colleagues and Fellow Students,

With great pleasure we welcome you at the 24th Scientific Congress of Hellenic Medical Students (SCHMS) & the 12th International Forum for Medical Students and Junior Doctors from the 27th to 29th of April 2018, in Divani Caravel Hotel Athens, Greece. The heart of the largest and oldest medical students congress beats in Athens!

The 24th SCHMS offers native participants 9 individual Scientific Sessions every day over the course of the conference. The 12th International Forum will provide each international participant with a complete interactive educational experience. Foreign students will be given the chance to actively participate in the congress. An integral part of the 24th SCHMS, is the 22nd Olympiad of Medical Knowledge, the long-running student's medical knowledge competition. This year, the Olympiad comes with a new format, approaching international standards. During the 24th SCHMS, more than 40 workshops for native and 10 for international participants will be held in the "Evangelismos" General Athens Hospital and the "Andreas Syggros" Athens Hospital of Cutaneous & Venereal Diseases. Students from every Faculty are welcome to attend and present Health Sciences related projects. Our congress encourages multidisciplinary, between the different scientific fields, in an effort to keep up with new research trends.

We hope that you enjoy the numerous activities that our Organizing Committee has prepared with passion and imagination. We thank every member of our Organizing and Scientific Committee, for planning step-by-step this congress. Last but not least, we would like to acknowledge our Sponsors for their support, contributions and implementation of our efforts in the best possible way.

It's a great pleasure to welcome you and we thank you for your participation in this huge event!

On behalf of the Scientific and the Organizing Committee of the 24th SCHMS,

Efstratia-Maria Georgopoulou

Undergraduate Student, Faculty of
Medicine, National and Kapodistrian
University of Athens
President of the 24th Scientific Congress of
Hellenic Medical Students

WELCOME LETTERS

Dear Colleagues and Delegates,

We are glad to welcome you to the 12th International Forum for Medical Students and Junior Doctors in Athens, Greece, from 27th to 29th April 2018. Our annual event is organized as part of the 24th Scientific Congress of Hellenic Medical Students.

The Congress will offer participants a unique experience through an exciting scientific program of cutting-edge presentations on issues in Medicine. This year's Forum will include 10 workshops and 2 special courses, 12 theoretical sessions, 9 individual presentation sessions and 11 round tables, covering a wide range of issues, all in English.

Our goal is to create a platform for interaction among medical students and leading scientists from all over the world. This is an opportunity for us to share research and discuss current issues in healthcare and medical science.

This year, the Congress is held in Athens, a city both ancient and modern that connects Past to Present and East to West. It offers visitors a harmonious blend of culture -ancient ruins, art and architecture- but also a great choice of cuisines and shopping opportunities; the perfect setting for young scientists to learn and get to know each other.

We promise you it will be a conference to remember. We look forward to welcoming you to Athens.

On behalf of the Organizing and Scientific Committee of the 12th International Forum,

Stefanos Karamaroudis

President of the Scientific Society of Hellenic
Medical Students

President of the 12th International Forum for
Medical Students and Junior Doctors

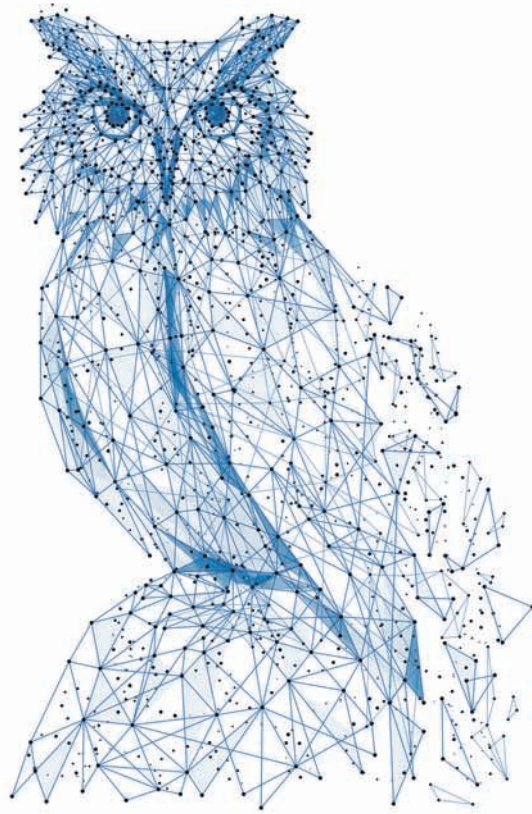

Georgios Zografos

President of the Scientific Committee of the
12th International Forum for Medical Stu-
dents & Junior Doctors

Professor and Head, 1st Propedeutic Surgical
Department, "Hippokration" General Hospi-
tal, Faculty of Medicine, National and
Kapodistrian University of Athens, Greece;

SCIENTIFIC SOCIETY OF HELLENIC MEDICAL STUDENTS

SCIENTIFIC SOCIETY OF HELLENIC MEDICAL STUDENTS (SSHMS)-ABOUT US

The Scientific Society of Hellenic Medical Students was founded in September 1993 and is a Non-profit and Non-Governmental Civil Society with broad volunteering activity. It has departments in all Greek medical schools, lists more than 3000 members and its actions are targeted towards all medical students, as well as students of related health science schools.

The aim of SSHMS is the activation of medical students and their involvement in scientific, social and educational matters, while its goal is the production of scientific and social work, with a clear focus on the selfless giving and volunteering.

At the same time, SSHMS's activities, independently of their scientific, educational and social character, also aim to strengthen the ties between medical students and students of related health science schools, through the reinforcement of team work and the cultivation of cooperation. The work of SSMHS has long exceeded the borders of the university institutions and now enters partnerships with public and private institutions, as well as social organizations, paving the ground for development of initiatives by the young.

SSHMS has entered partnerships with the majority of scientific institutions of our country, such as the Panhellenic Medical Association and local corresponding associations, the Athens Medical Society, the Hellenic Cardiological Society and many more, but also with international ones, such as the American College of Surgeons and the Institute of Electrical and Electronic Engineers. At the same time, it keeps close relationships with a number of voluntary organizations, such as Doctors of the World and the Ark of the world.

ALUMNI OF SCIENTIFIC SOCIETY OF HELLENIC MEDICAL STUDENTS

The Alumni of the Scientific Society of Hellenic Medical Students (SSHMS) was founded on the 14th of May 2016. It consists of past members of the SSHMS and has as a goal to preserve the relationships between them and the active medical students team of the SSHMS.

The members of the Alumni, before its birth, were already on close contact

with the successors of the SSHMS, and have been providing their organizing and medical knowledge and expertise in ongoing national projects of the society such as the Essential Skills in the Management of Surgical Cases (ESMSC) and the Applied Basic Clinical Seminar with Scenarios for Students (ABCS3), all of which begun during our student years. All of us who were members of the SSHMS and lived through its difficult and beautiful moments, we feel the need and the responsibility to maintain this experience and transmit it to the new generation who are now in the driver's seat. Furthermore, we still feel members of this great family, still living special moments, working and building up strong character together and making friendships from all around Greece and abroad through an abundance of projects and meetings. The Alumni of SSHMS through projects, lectures and meetings has the ambition to be the instrument that will guarantee this initiative through the most creative way.

24TH SCIENTIFIC CONGRESS OF HELLENIC MEDICAL STUDENTS

22nd MEDICAL OLYMPICS

The Committee of the 22nd Medical Olympics and the Organizing Committee of the 24th SCHMS gladly invite you to participate and test yourselves and your knowledge in the only competition of medical knowledge for undergraduate students in Greece!

The Medical Olympics is a competition of medical knowledge and critical thinking, which covers the entire spectrum of medical science, at a student level. It is addressed to undergraduate students of biomedical sciences, from every country.

The Medical Olympics is an established part of the Scientific Conference of Hellenic Medical Students (SCHMS) the last 21 years.

This year, the 22nd Medical Olympics is organized as part of the

24th SCHMS and the 12th International Forum.

Its prime objective is to promote and reward medical knowledge of medical students, by enhancing teamwork and through the exchange of views among the participants. The Medical Olympics aim at recreating the cooperation among all the medical specialties and biosciences, where everybody will be called to manage clinical problems in practice.

The Medical Olympics consist of two different competitions:

- The Olympiad of Preclinical Knowledge, which includes questions of basic biomedical sciences
- The Olympiad of Clinical Knowledge, which includes clinical cases concerning every surgical and medical specialty, and this year is comprised of both a written part and live clinical scenarios.

The selection of the questions will be appointed to the Scientific Committee of the Medical Olympics, which consists of the teaching staff of the National and Kapodistrian University of Athens and consultants of the Greek National Healthcare System.

Anyone who is interested can participate either individually or in a group (of up to 3 students), in both competitions.

This year, as also in the past versions, we try to upgrade the quality of the competition and widen the eligibility criteria for participation. This is the first Olympics where the ability to choose between English and Greek as the language of the examination is provided, so that the competition can be more accessible to our colleagues from abroad. Furthermore, during the Olympiad of Clinical Knowledge, a second phase is included for the first time, where students will test their skills on clinical scenarios.

Eligible to participate in the 22nd Medical Olympics are undergraduate students from every biomedical department, coming from any country. The participation in the Olympics is covered within the basic registration to the Congress. The members of the Organizing Committee of the Olympics, as well as any other person involved with the Organizing Committee of the Congress in any other way, are not allowed to participate.

Prizes will be awarded to the teams of the three first places for both competitions, according to the score they will achieve. The announcement of the results as well as the awards ceremony will take place at the Closing Ceremony of the Congress.

We wish the best of luck to everyone!

AWARDS

The 24th Scientific Conference of Hellenic Medical Students includes three types of awards.

The main goals of the award process are the following:

- a fair evaluation of the papers with transparency and objectivity, via an analytical evaluation system
- to promote all participants' efforts by presenting the detailed score of both the distinguished and the unselected papers
- to enhance cooperation, through participation in the evaluation process of teachers and students from all seven Hellenic Medical Universities
- taking the oral presentation into consideration by introducing the session of the oral presentations submitted for awards to the scientific program
- the ecumenical meeting of medical specialties, via presence in the evaluation committee professors from all the major specialties
- and finally, the worthy promotion of the best oral presentation, which not only will fully represent the scientific, social and educational orientation of the Scientific Conference of Hellenic Medical Students but also will harken to the pulse of research developments.

More specifically, at the core of this year's awards is the "Ars Medica" award. It is the award of the best oral presentation and constitutes an established institution, which is evolving alongside the conference, and aims at promoting the noble competition and the discovery of promising future medical fields, while, at the same time, urges students and young doctors to contemplate, to cooperate and ultimately to improve. Although for several years the prize-giving process is part of the conference, last year, for the first time, a new system for best oral presentation's excellence was introduced. In the context of consecutive improvement and modernization of the awards ceremony, this year, at the 24th Scientific Conference of Hellenic Medical Students, we follow the suggestion of our fellow students and further develop the evaluation system of the oral presentations submitted for awards. The institution of the best oral presentation award, through the promotion of all the mentioned principles, especially the equal consideration of all branches of Medicine, and through the promotion of Research's fundamental principles, is transformed into a revival of "Ars Medica", viz. "Art Medicine", as expressed by the great doctor of antiquity, Claudius Galinos, in his homonymous book.

Vote for your favorite Oral Presentation for the "Ars Medica" Award, after the "Ars Medica" session, which is held on Saturday 28/4/2018, 16:45-19:00:

AWARDS

“The Owl Excellence” award is the prize-giving process of the e-posters. It is governed by the same principles as that of the oral presentations and aims at qualitatively upgrading and highlighting the scientific efforts of the participants in the process. The title of this action is inspired by the symbol of wisdom and Athens, the owl, which features this year the whole conference, too.

“The Innovation Presentation” is being introduced for the first time in the context of upgrading and improving the quality of the conference. It is the distinction of the most pioneering oral presentations of the 24th Scientific Conference of Hellenic Medical Students and an award from students to students. All the oral presentations that will take part in the conference’s sessions are allowed in the process, while the evaluation is based on innovation, interest, wider student approach and presentation quality. It also exposes all conveners to the process of evaluating their fellow students and colleagues, to the process of critically reviewing a presentation they will watch, and also to a process of deciding, through their vote, the most interesting issues of the 24th Scientific Conference of Hellenic Medical Students.

Last, we would like to thank all the academics that honored us by their participation in the Scientific Committee of Evaluation I and II, grading the oral presentations of “Ars Medica” award and in the Scientific Committee of Evaluation III, grading the e-posters of “The Owl Excellence” award.

We wish good luck to all participants!

 - Child Abuse
 - Promoting immunizations in the anti-vaccine era
 - Affirming LGBT people through effective communication
 - Laparoscopic Surgery skills
 - Essentials of writing a Review
 - How to prepare your CV
 - Plastic Surgery skills
 - How to prepare your personal statement
- PLUS: 2 Special Courses**
- Evidence-Based Medicine
 - Fetal Physiology alphabet : First Aid for CardioTocoGraphy (CTG) interpretation

Short description of workshops topics

WK1: “Medicine with limited resources”

Duration: 2 hours

Trainers: Dimitrios Jannussis, Agis Terzidis, Christos Giannou, Christos Salakos

Coordinators (from the Org. Committee): George Papoulakos, Damianos Papafilippou

This workshop concerns the provision of medical services to people in need, when conditions are harsh, and resources are limited.

Distinguished doctors who have participated in volunteer missions will share with the students their experiences under difficult conditions in Greece and other countries.

Our invited practitioners will focus on the most common clinical cases they have dealt with during their missions. Through discussion, they will try to raise awareness about volunteerism among future doctors, and help them become involved with it. This interactive workshop will prepare junior doctors and medical students to provide medical services in any situation, no matter how difficult the conditions may be.

12th INTERNATIONAL FORUM WORKSHOPS

WK4: “Promoting immunizations in the anti-vaccine era”

Duration: 1 hour and 15 minutes

Trainers: Vana Papaevangelou, Marina Mitrogiorgou

Coordinators (from the Org. Committee): Vassiliki Spyrou, Despoina-Maria Karavolia

As doctors, we will have to deal with 4 types of parents:

- the ones who are willing to learn,
- the restrained ones,
- the ones who “know better”,
- the stubborn ones.

Our role is to address their concerns and help them overcome their doubts, in order for them to make the right decision for their children’s health. What types of vaccines are there in the market? What are the acute and chronic side-effects of vaccines? And, most importantly, what are the consequences of NOT vaccinating children? Our workshop will answer these questions, questions that concern every future medical doctor.

WK5: “Affirming LGBT people through effective communication”

Duration: 2 hours

Trainers: Flora Bacopoulou, Despoina Apostolaki

Coordinators (from the Org. Committee): Nefeli Griva, Nina-Rafailia Karela

In this workshop students will learn ways to provide affirming and inclusive healthcare for lesbian, gay, bisexual and transgender, or LGBT, patients, through basic communicational practice.

The module is comprised of both a theoretical and a practical part.

In the first part, various terms related to the LGBT community will be clarified. In addition, an explanation about the importance of primary communication principles will be provided.

As for the practical segment, participants will be divided into groups, in order to become familiar with the use of such terms and principles by working on case scenario examples.

This procedure will offer students the opportunity to comprehend the often confusing LGBT terms, and realize how important it is for a doctor of our time to appropriately interact with LGBT patients, approaching their health problems according to a certain medical and social method.

12th INTERNATIONAL FORUM WORKSHOPS

WK7: “Essentials of writing a Review”

Duration: 2 hours and 30 minutes (Narrative review) and
2 hours and 30 minutes (Systematic review)

Trainers: Theodoros N. Sergentanis (coordinator), Aikaterini Kourtesi, Ioannis Ntanas-Stathopoulos, Kalliopi Kappou, Aristeia-Maria Papanota

Coordinators (from the Org. Committee): Aspasia Manta, Christos Giannakas

In this workshop, participants will have the opportunity to explore the concept of systematic reviews and get the answers to basic questions:

- What is a review?
- Are there different types of reviews?
- Why do we need them?
- Are there truly original ideas?

Apart from the theoretical lectures, the workshop offers a hands-on course, in which participants will be trained in taking all the necessary steps in order to write a review: from evaluating a fixed database of articles, to making an outline of the actual review article. Experienced instructors will be guiding and assisting during this process.

Since basic epidemiology knowledge is needed for the process, this workshop is open to medical students in their 3rd year of studies and above.

WK8: “How to prepare your CV”

Duration: 1 hour

Trainer: Elisabeth O. Johnson

Coordinators (from the Org. Committee): Evanthia Bletsas, Christos Fiammegos

The aim of this workshop is to provide fundamental knowledge on forming a curriculum vitae, or CV. A qualified medical doctor and expert in education will give an exceptional lecture, sharing tips and tricks for a well-written CV.

In this one-hour, hands-on workshop, the participants will also be given the opportunity to form their own CV. A nicely put-together CV is an important advantage in today's highly competitive, professional world. Keep that in mind, and join our workshop!

12th INTERNATIONAL FORUM WORKSHOPS

WK9: “Plastic Surgery skills”

Duration:

1 hour and 30 minutes

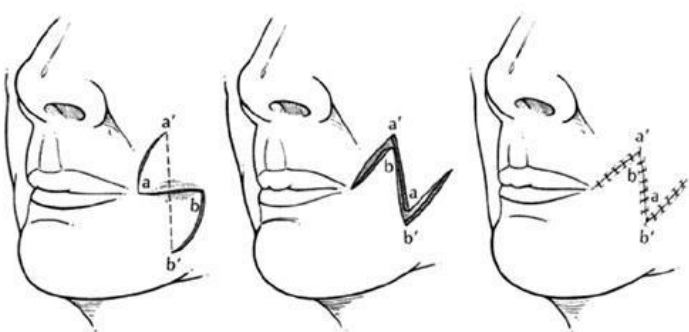

Trainers:

Nikolaos S. Lympelopoulos (coordinator), Apostolos Karkanevatos

Coordinators (form the Org. Committee):

Vassiliki Spyrou, Despoina-Maria Karavolia

Flap surgery is a necessary technique for plastic and reconstructive surgery. Various types of flaps are performed, and there are many different indications that lead to their application. This advanced workshop is designed to provide participants all the basic informa-

tion on the major types of flaps and skin grafts, and to demonstrate appropriate application on specific body regions, through a hands-on experience on pig skin. Basic suturing skills and acquaintance with routine closure techniques are prerequisites for this workshop.

WK10: “How to prepare your Personal Statement”

Duration:

1 hour and 15 minutes

Trainer:

Theoklis Zaoutis

Coordinators (form the Org. Committee):

Evanthia Bletsa, Christos Fiamegkos

This workshop aims at providing advanced strategies for a personal statement (PS) which will truly stand out, giving any young doctor a real chance to get an interview for the position they wish. A lecture will be given by an eminent doctor and expert in the field of education, preparing the participants who wish to apply for a position. In addition, PS examples, self-assessment and brain-

storming methods will be presented in detail, helping participants develop adequate writing skills necessary for any application process.

12th INTERNATIONAL FORUM WORKSHOPS

Special Course: “Evidence-Based Medicine”

Duration: 1 hour and 15 minutes

Trainers: Theoklis Zaoutis (coordinator), Georgia Kourlampa

The value of understanding the inner workings of Evidence-based Medicine is more precious than ever in the Information Age of today. Towards this idea, this course, by Dr. Zaoutis, aims to familiarize the participants both with the process of reviewing and understanding a set of medical information in depth, while at the same time providing the tools, tips and tricks needed to structure data sets of their own on a high level. Participants in the workshop will be divided into smaller groups, through which they will review, analyze and examine case reports, statistics analysis and other forms of big-data in the pursuit of unlocking the secrets to an expert assessment and subsequent creation of their own evidence reports.

Special course: “Fetal Physiology alphabet: First Aid for CardioTocoGraphy (CTG) Interpretation”

Duration: 1 hour

Trainer: Ferha Saeed

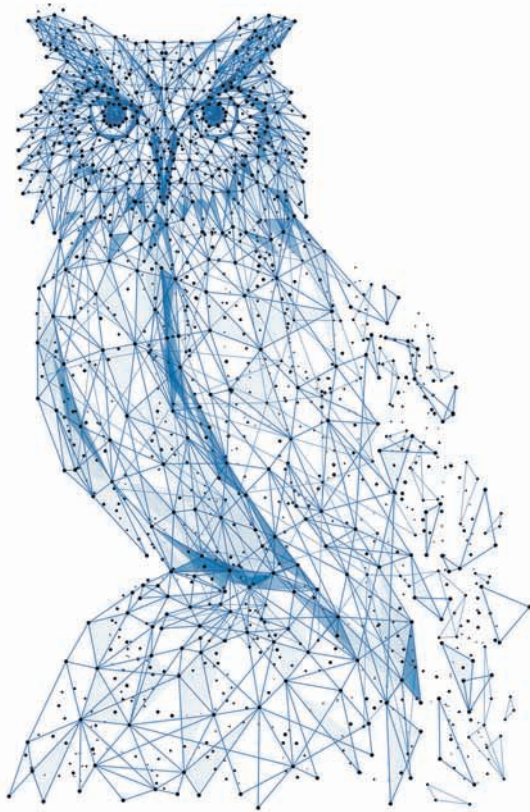

Understanding Fetal physiology is essential to optimize birth outcomes. Although CTG is reflective of the status of the fetus, in several occasions clinicians fail to recognize abnormal patterns, which can result in compromised babies. Despite CTG being the current main tool to manage intra-partum period, there is hardly any teaching at the undergraduate level.

In this course, we have designed a dedicated presentation on the principles of fetal physiology (part 1), followed by interactive cases on common cases (part 2). A more individualized teaching approach will be followed in the second part of the workshop with dedicated Q&A time.

“THROUGH THE EYES OF A ROBOTIC SURGEON”

Surgeon:

Dr Konstantinos M. Konstantinidis, Director of General, Bariatric, Laparoscopic & Robotic Surgery Athens Medical Center
Adjunct Professor of Surgery, Ohio State University, USA
Scientific Medical Director, Athens Medical & Pediatric Center
Secretary, Clinical Robotic Surgery Association, CRSA
Chairman, Dept. of General, Bariatric, Laparoscopic & Robotic Surgery (SEERSS)
President, Greek Chapter of American College Of Surgeons (ACS-GC)
President of European Society of Robotic Surgery (ESRS)
President of Hellenic Scientific Society of Robotic Surgery (HSSRS)

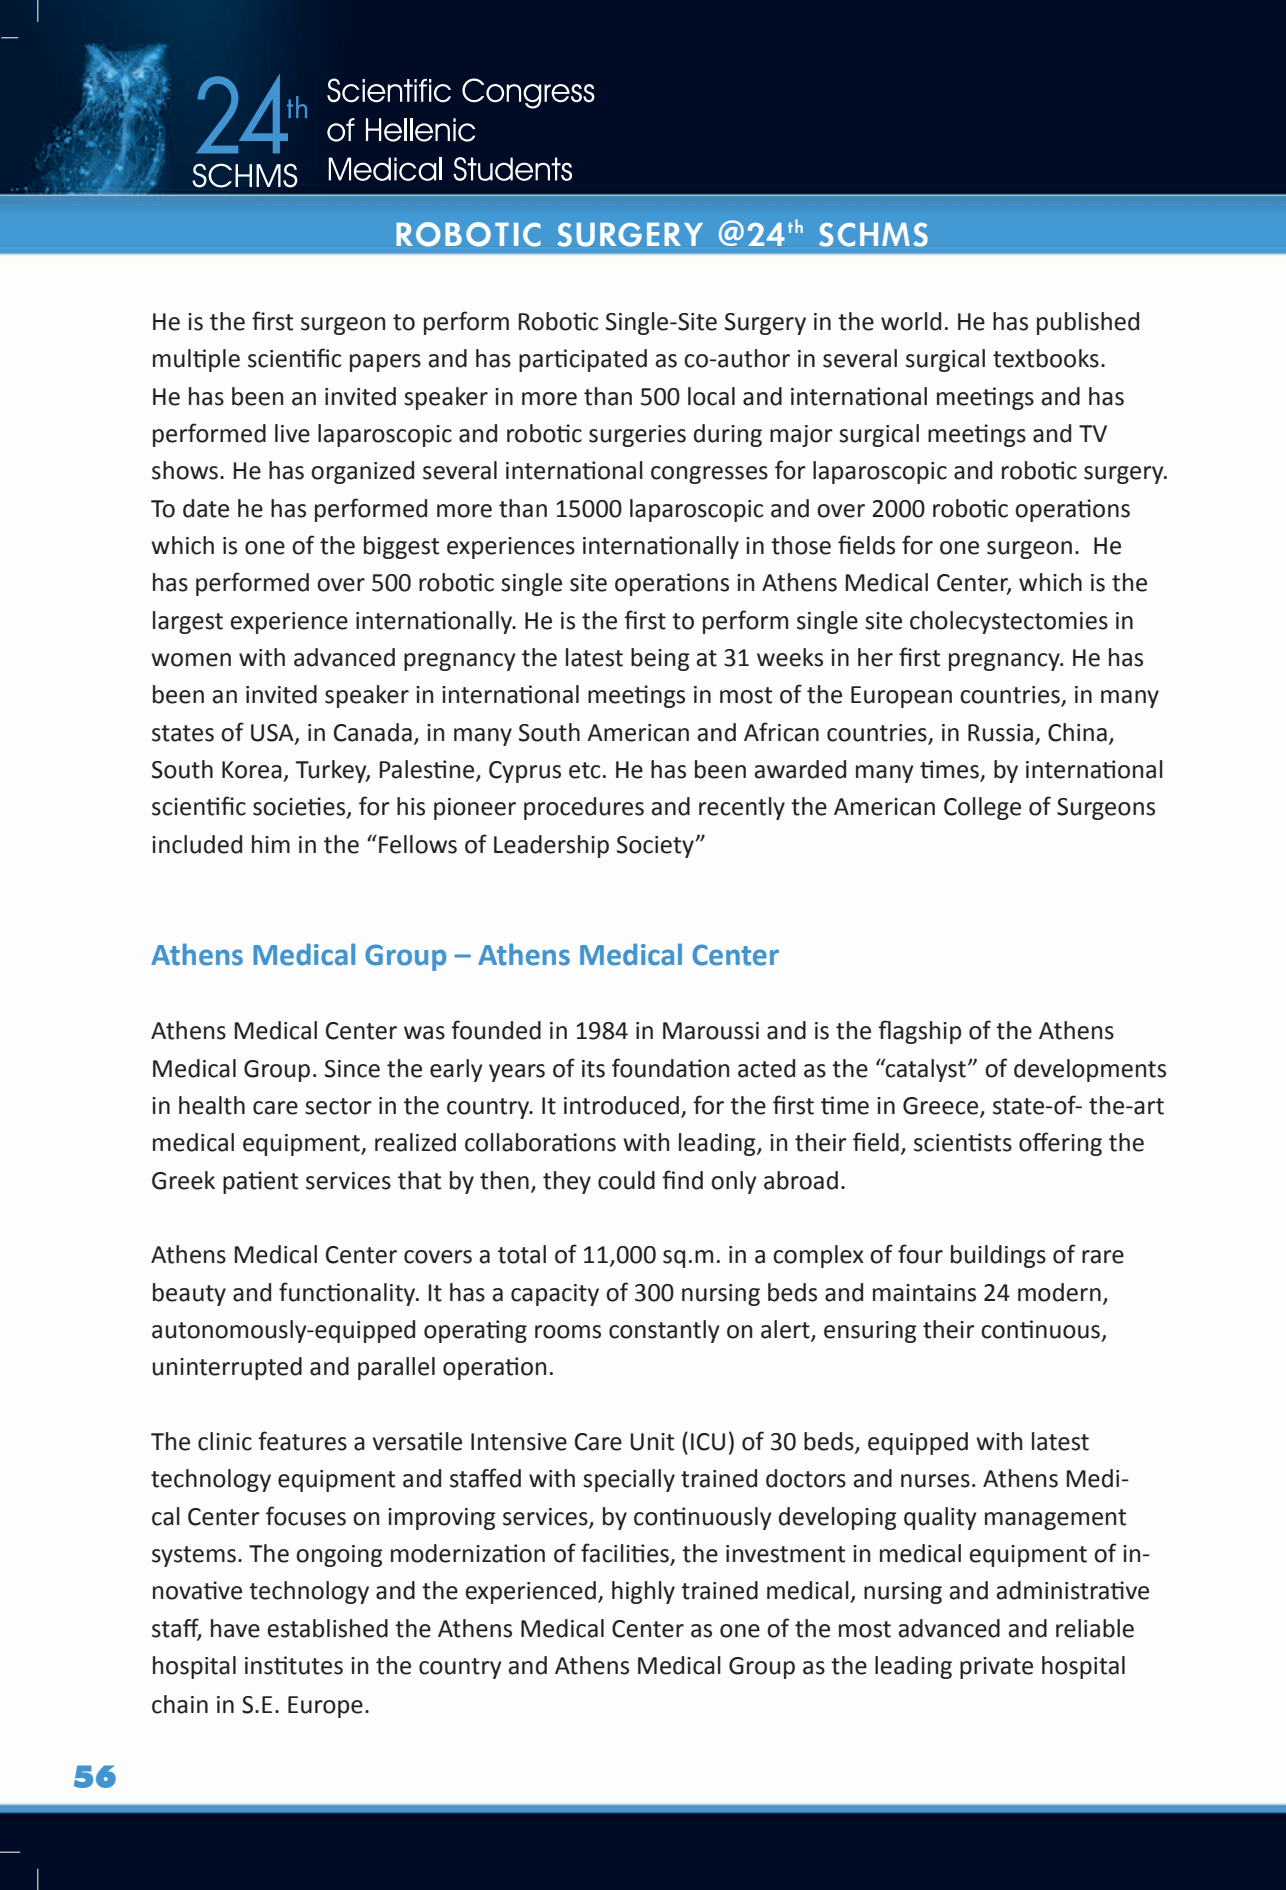

Dr Konstantinidis and his team will perform live a Robotic Repair of a large Hiatal Hernia and Nissen Fundoplication at Athens Medical Center Hospital. During the live-streaming session you may observe all surgical step of the Robotic Surgery using the Da Vinci Surgical System® by Intuitive Surgical. At this session you get to see the surgeon and view the exact image the surgeon has while performing the surgery. The experienced Robotic Surgeon will provide full description of the procedure that will take place just in front of your eyes!

Short Curriculum Vitae

Konstantinos M. Konstantinidis, MD, PhD, FACS is an Adjunct Professor of Surgery at Ohio State University, USA and the Director of the General, Bariatric, Laparoscopic and Robotic Surgical Clinic as well as the Scientific Director of Athens Medical and Pediatric Center and Athens Medical Group.

He is the President of the Greek Chapter of the American College of Surgeons, the Honorary President of the South Eastern European Society of Robotic Surgery and the President of the Hellenic Scientific Society of Robotic Surgery.

He is the first to introduce lasers, laparoscopic, bariatric and robotic surgery in Greece. He also is a member of the Board Of Directors of the Clinical Robotic Surgical Association (CRSA). He is a member of 36 medical and surgical societies. He has proctored over 200 procedures in various hospitals in Europe to start applying robotic surgery and has organized multiple courses of laparoscopic and robotic surgery.

ROBOTIC SURGERY @24th SCHMS

He is the first surgeon to perform Robotic Single-Site Surgery in the world. He has published multiple scientific papers and has participated as co-author in several surgical textbooks. He has been an invited speaker in more than 500 local and international meetings and has performed live laparoscopic and robotic surgeries during major surgical meetings and TV shows. He has organized several international congresses for laparoscopic and robotic surgery. To date he has performed more than 15000 laparoscopic and over 2000 robotic operations which is one of the biggest experiences internationally in those fields for one surgeon. He has performed over 500 robotic single site operations in Athens Medical Center, which is the largest experience internationally. He is the first to perform single site cholecystectomies in women with advanced pregnancy the latest being at 31 weeks in her first pregnancy. He has been an invited speaker in international meetings in most of the European countries, in many states of USA, in Canada, in many South American and African countries, in Russia, China, South Korea, Turkey, Palestine, Cyprus etc. He has been awarded many times, by international scientific societies, for his pioneer procedures and recently the American College of Surgeons included him in the "Fellows of Leadership Society"

Athens Medical Group – Athens Medical Center

Athens Medical Center was founded in 1984 in Maroussi and is the flagship of the Athens Medical Group. Since the early years of its foundation acted as the "catalyst" of developments in health care sector in the country. It introduced, for the first time in Greece, state-of-the-art medical equipment, realized collaborations with leading, in their field, scientists offering the Greek patient services that by then, they could find only abroad.

Athens Medical Center covers a total of 11,000 sq.m. in a complex of four buildings of rare beauty and functionality. It has a capacity of 300 nursing beds and maintains 24 modern, autonomously-equipped operating rooms constantly on alert, ensuring their continuous, uninterrupted and parallel operation.

The clinic features a versatile Intensive Care Unit (ICU) of 30 beds, equipped with latest technology equipment and staffed with specially trained doctors and nurses. Athens Medical Center focuses on improving services, by continuously developing quality management systems. The ongoing modernization of facilities, the investment in medical equipment of innovative technology and the experienced, highly trained medical, nursing and administrative staff, have established the Athens Medical Center as one of the most advanced and reliable hospital institutes in the country and Athens Medical Group as the leading private hospital chain in S.E. Europe.

Robotic Surgery Competition

All the participants of the 24th SCHMS will have the opportunity to try their surgical skills on the Da Vinci XI Surgical System Simulator, courtesy of SofMedica- Life Saving Innovation. The simulator will, also, be exhibited on the convention hall.

Become the Surgeon for 10 minutes and show us your skillfulness.

The top 3 scores will compete for a prize on Sunday 29th April 2018.

The prize will be rewarded during the congress' s closing ceremony.

Scientific Responsible for the Course: Ortansia Doryforou, Vassiliki Bizimi

Organizing Committee: George Papoulakos, Damianos Papaflippou, Head of the organization of the Satellite Course (on behalf of the Organizing Committee of the 12th Intl Forum for Medical Students and Junior Doctors)

Instructors: Nikolaos C. Kyriakopoulos, Panagiotis Filippou, Dimitrios Anagnostopoulos, Andreas Kostroglou, Evgenia Efthymiou, Natali Sideri, George Iliadis, Ioanna-Maria Kostoula

This year, a Satellite Course will be organized by the 24th Scientific Congress of Hellenic Medical Students and the 12th International Forum for Medical Students and Junior Doctors. The topic of this course is “Ultrasound essentials for beginners: a hands-on course”. It is a course dedicated to Ultrasound basic knowledge and skills, which will be held in Athens, Greece, on Thursday 26th, April 2018, one day before the beginning of the Scientific Congress.

The Satellite course consists of two parts: theory and hands-on training. The main purpose of the theoretical part is to create the necessary background, as far as the basic principles of the ultrasound imaging are concerned, so that all participants are able to tackle the practical part that follows, no matter what university they have come from or which year of studies they are in. At the end of this part, trainers will brief students on further educational opportunities concerning ultrasound imaging. Moving on to the hands-on part, the participants will be divided into small groups and work on techniques they will find very useful in everyday clinical practice, such as:

- Essentials in ultrasound imaging
- U/S guided interventions
- Focused Assessment with Sonography in Trauma (FAST).
